LOCK/UNLOCK

WARNING STATE

The user enters the Car Status screen. If any of the sensors from the Car Status are in the warning state, the user will see a small red dot next to the lock icon.

UNLOCK STATE

In case the car is unlocked, the lock icon will be unlocked with the red dot.

LOCK/UNLOCK

STEP 1

If all the sensors from the Car Status are in the OK state, the user will see a locked icon.

When the user taps on the Lock icon he/she enters the Car Status screen.

STEP 2

The status will be updated 4-8 minutes after the ignition off.

The user can initiate the unlocking of the car via Lock/Unlock button.

IMPORTANT: By doing a pull-to-refresh application will manually contact the car to get the updated data. This feature will be implemented in October '21.

LOCK/UNLOCK

STEP 3

The user is prompted with the security warning.

STEP 4

The app sends a request to the car to initiate unlocking.

LOCK/UNLOCK

STEP 5

After the request was processed, the status of the car is changed. It takes approximately 10-30 seconds to process the request.

STEP 6

The user can tap on each of the buttons to check the state of the car.

LOCK/UNLOCK

ADDITIONAL INFO

The user will not be able to lock the car if:

- Any of the doors are open
- Smart key is inside the car

The lock button in any of these cases is disabled.

The user can find out the reason the service was disabled by tapping on the Info icon.

LOCK/UNLOCK

ADDITIONAL INFO

The user will not be able to unlock the car if:

- Car Alarm is set
- Car was locked with key

The unlock button in any of these cases is disabled.

The user can find out the reason the service was disabled by tapping on the Info icon.
